

TINTRI SMART STORAGE KEEPS VDI SIMPLE

Hundreds of companies trust Tintri smart storage to support their VDI. We've completely changed their thinking about VDI—that's because we challenge the 'storage quo'. You see, conventional storage simply isn't built for VDI (it's built for physical workloads). Tintri is the ONLY storage system specifically built for virtualized environments and to enable VDI.

ESG LABS TESTED TINTRI AND VALIDATED VDI CAN BE SIMPLE:

Total datastores requiring management	1 datastore	Time to deploy 1,000 linked clones	2.5 hours
Time to install, configure and deploy first VM	8 minutes	Cost per VM	< \$60

TANEJA GROUP INTERVIEWED TINTRI CUSTOMERS TO ASSESS THE IMPACT OF SMART STORAGE:

PERFORMANCE	MANAGEABILITY	CAPEX
6x faster performance	52x less admin time	75% smaller footprint

AND CUSTOMERS HAVE MEASURED TINTRI'S IMPACT ON VDI:

UNIVERSITY OF ARKANSAS		YAVAPAI COLLEGE
AVERAGE TIME TO ADD A NEW VM: FROM 30 MINUTES TO 3 SECONDS	STORAGE FOOTPRINT: CUT IN 1/2	COST OF VIRTUAL DESKTOPS: REDUCED 50%
<i>"All of the complexity of conventional storage is gone. We don't have to manage our storage anymore and our VDI just works."</i>	<i>"The unique VM aware architecture, the simplicity of management, and the cost-effectiveness set Tintri apart."</i>	<i>"We are able to deploy virtual desktops at less than half the cost of physical desktops, and provide a better user experience."</i>

IF YOUR ORGANIZATION HAS PRIORITIZED VDI, YOUR STORAGE SHOULD TOO.
