Tintri

VDI SUCCESS SERIES
BARTHOLOMEW COUNTY

"The unique VM aware architecture, the simplicity of management, and the cost-effectiveness set Tintri apart."

Jim Hartsook, Director of IT

BEFORE	ENVIRONMENT	AFTER

OBJECTIVE

Provide adequate performance for a growing pool of virtual desktops.

ENVIRONMENT

- VMware vSphere
- VMware View
- Dell R610 servers

TROUBLESHOOTING

"Tintri's intuitive management and VM aware statistics make troubleshooting a breeze."

PROBLEM

"We didn't need extra storage capacity, and dedicating staff to only manage the storage environment was not possible."

Bartholomew County needed a storage system that could support the performance demands of mixed server and desktop workloads

VM PROFILE

- Windows XP and Windows 7 desktops

TINTRI

- VMstore T540 systems

STORAGE FOOTPRINT

Cut in
1/2

"When we considered going with Tintri, the data board at Bartholomew County that approves technology purchases was concerned about managing both our existing storage and Tintri. But, managing Tintri VMstore is so simple it exceeded our expectations on all fronts."
